

August 2015

**MatHero Summer School on Organic Photovoltaics**

The MatHero Summer School was held from August 23rd to 27th 2015 at Freudenstadt – Lauterbad “Black Forrest”, Germany (<http://www.mathero.eu/summerschool.php>). Advent as a partner to MatHero consortium participated in this summer school.

Organic Photovoltaic Technology has had a rapid development in the last years. In order to continue with this progress, high skilled young researchers are required in a wide range of topics going from material development to find the adequate application market. Therefore, it is important to provide multidisciplinary training to the young researchers.

The MatHero Summer School on Organic Photovoltaics will provide training on a wide range of topics through a series of lectures covering most of the technical aspects of OPV. This summer school is designed to cover the entire value chain from fundamental organic solar cell research to industrial application. The young researchers will also be given the opportunity to present a poster or give a presentation about their research.

*Advent Technologies is a world leader in the development of new materials and systems for energy applications. Advent Technologies is headquartered in Cambridge, MA, USA. The company also occupies research and development space in Patras, Greece where pilot manufacturing is taking place.*
